<b>SNR</b>	> 110 dB
<b>THD+N</b>	< 0.01%
<b>Size</b>	220x150x50mm

**INSTALLATION**

## Quick Installation Guide

### 1. Preparation

Disconnect vehicle battery. Gather tools: wire strippers, crimping tool, multimeter, screwdrivers, zip ties.

### 2. Mounting

Select a secure location with adequate ventilation (under seat or trunk). Mount using provided brackets.

### 3. Power Wiring

Connect B+ to battery through inline fuse. Ground to clean chassis point. Remote wire to ACC or head unit remote output.

### 4. Signal Input

Factory head unit: use High-Level input. Aftermarket: use RCA. Digital: use Optical/USB for best quality.

### 5. Speaker Output

Connect each channel to corresponding speakers. Maintain correct polarity. Label all wires.

### 6. Software

Download Alchimist DSP software from [alchimists.com/documents](http://alchimists.com/documents). Connect via USB or Bluetooth. Configure EQ, crossover, time delay, and levels.

---
